Mr. Paul Montney
Director of Environmental Affairs
Georgia-Pacific Corporation
P.O. Box 105605
Atlanta, GA 30348-5605

Dear Mr. Montney,

The Department of Toxic Substances Control (DTSC) has received a revised Shed Stockpile Characterization Data Memorandum (Stockpile Data Memo) for Georgia-Pacific Corporation's Wood Products Manufacturing Facility at 90 West Redwood Avenue, Fort Bragg, dated September 19, 2006. The Stockpile Data Memo has been revised in response to comments discussed with Ms. Bridgette DeShields of BBL, Inc. September 15, 2006.

The Stockpile Data Memo presents data collected from the potentially impacted materials encountered during foundation removal activities and outlines the procedures that will be used to remove and dispose these materials offsite. Based on our review, the Stockpile Data Memo adequately documents the results obtained for the potentially impacted foundation materials. Georgia-Pacific Corporation (G-P) may now begin offsite transport and disposal of these materials in accordance with the procedures outlined and referenced in the Stockpile Data Memo. Please be aware that G-P will still be required to implement dust control measures to minimize fugitive dust emissions during all moving, loading, and hauling activities.

If you have any questions, you may contact Mr. Ryan Miya of my staff at (510) 540-3775.

Sincerely,

Barbara J. Cook, P.E., Chief
Northern California Coastal
Cleanup Operations Branch

Mr. Paul Montney
